NAME OF PROCEDURE:

Standard operating procedure for the standardized recruitment strategy for participants for LightCARE and LightWAY in Denmark

1 PURPOSE AND APPLICABILITY

This document outlines the procedure for recruitment for the LightCOM for LightCARE and LightWAY trials by outlining the standardized recruitment procedure that directs participants through a screening process and into the Danish trials.

A total of 550 individuals aged 18 - 60 years will be recruited from the Capital Region of Denmark into the LightCARE (n=200) or LightWAY trials (n=300).

Participants must have a BMI of ≥ 30 (27.5 kg/m² for minority ethnic groups) to participate in the LightCARE trial and a BMI of ≥ 35 kg/m² with comorbidity or a BMI of ≥ 40 to enroll into the LightWAY trial. However, the bodyweight of the participant may not exceed 250 kg at the time of inclusion.

2 PERSONNEL QUALIFICATIONS AND RESPONSIBILITIES

- All staff must be trained before starting the recruitment and screening process and ensure all data is collected in line with this SOP.
- All staff are responsible for making sure that each participant has read and understood the participant information sheets.
- All staff must ensure they can answer emails and phone calls from the interested public in a professional manner.

5 PROCEDURE

1.4 Recruitment Procedure for Denmark

- Recruiting participants for LightCARE and LightWAY trials will be through the same avenues.
- Participants must be living in the Capital Region of Denmark.
- Participants will be recruited via
 - local newspapers
 - social media (e.g., Facebook ads targeted individuals with obesity living in the included municipalities and in municipality-related Facebook groups)
 - posters in job centers, local gyms etc.
 - local GPs. Local GPs will be contacted and asked to give information about the project to

- potential participants (see SOP on screening)
 - relevant societies (e.g., adipositas)
- Specific for LightWAY: participants will also be recruited directly from endocrinologists at Hvidovre Hospital (see SOP on screening).

1.1 Standardized recruitment procedure

The standardized recruitment procedure has three setups, namely 1. Online eligibility screening
2. Pre-screening phone call, 3. Information and screening meeting:

1. Online eligibility screening

- The recruitment strategies will direct potential participants to the recruitment website (<http://xxxx/>).
- On the recruitment website, potential participants will have access to participant information sheets on both LightCARE and LightWAY (Resource xx) which provides details on what the two trials are about and what they would be asked to do if they volunteer to take part.
- Participants will be able to email or phone the trial centre to ask questions directly within normal working hours.
- If the potential participants are still interested in participating, they will be directed to the eligibility questionnaire on the home page (Resource xx).
- If eligible based on the results from the questionnaire which includes questions on weight, height, residence, and ethnicity (see resource xx), the participants will be asked to give their e-mail and phone number.

2. Pre-screening phone call

- Potential participants for either LightCARE or LightWAY trials will receive a pre-screening phone call from the project team (see SOP xx) to
 1. clarify inclusion and exclusion criteria (see SOP on screening).
 2. if the potential participants are found eligible an appointment will be made for an information and screening meeting (see SOP xx). It will be stated that the potential participant has the right to bring a next of kin to the meeting.
 3. The participant information sheet will be sent by e-Boks to the potential participant.

3. Information and screening meeting

- At this meeting, the potential participant will be informed about LightCARE or LightWAY depending on which trial he/she is eligible for.
- The potential participant will be weighed, and height will be measured to calculate BMI.
- Inclusion and exclusion criteria will be clarified.
- If the participant is considered eligible for inclusion, he/she will be asked to sign a consent to participate in the trial.
- An appointment for the first CID will be made.

6 EXPECTED RESULTS, TROUBLESHOOTING AND CORRECTIVE ACTION

Recruitment response rates will be collected monthly and study uptake will be assessed. We will need to recruit a target of approximately xx participants per week throughout the recruitment phase (xx – xx 20xx). If these pre-set targets are not met, advice will be sought from the Trial Steering Committee. A decision will

be made to extend the recruitment period or explore additional recruitment strategies (e.g., involve relevant influencers, broaden the recruitment area).

Further, to ensure generalizability with the general population, six months after the start of recruitment (summer 2024) education level will be settled for the included participants to evaluate if the recruitment strategy should focus on more highly or lower educated participants.

If a potential participant has been screened eligible for e.g., LightWAY at the Pre-screening phone call is found eligible for the LightCARE trial and not the LightWAY trial at the Information and screening meeting, the potential participant will be found ineligible to participate in LightWAY. In order not to burden the potential participant with increased waiting time for enrolling into the trial, the trial personal at the Information and screening meeting will update the RedCap Record and let the opposite trial-staff know this participant is eligible for the opposite trial.

The same scenario will apply if a potential participant falsely has been found eligible for LightCARE but should have been recruited to LightWAY.

7 DATA AND RECORDS MANAGEMENT

RedCap will gather information from the Online eligibility screening questionnaire.
